

Subscription-Based Content Sites for Online Lesson/Unit Planning*

(Most offer free trials; or perhaps your district has purchased subscriptions)

Always select videos/activities that are at an appropriate rate of speech for your students' proficiency level so that they can capture the information and also at an appropriate length so they can capture all the information (or break the viewing into 1-3 minute segments). Make sure the segments you select have excellent visual support that makes the language clear.

Kids Discover
